Knowledge and Experience

At Hayes we know the quality and dependability of the lab reports paired with quick turn-around and reasonable rates are a must for your business.

This is why we use state of the art equipment and have extensive internal quality controls to ensure reports are accurate and defensible.

Detailed analysis of your samples are performed by our staff of PhD, Masters and BS Degreed Microbiologist. This highly trained team provides precise, efficient, effective and unmatched quality analytical data.

Our team members are directly accessible should you have questions about your results or reports.

Fast Turn-Around

Hayes Microbial understands that your job isn't 9-5 – neither is ours. We work around the clock to accommodate busy schedules. Offering 24 hour turn-around to keep your projects moving. We are available anytime –day, night, even weekends to analyze samples and answer questions right away.

Affordable Pricing

At Hayes Microbial Consulting we work hard to keep our overhead low so we can pass the savings on to you. As a result, Hayes Microbial offers the best value in the industry.

Our extremely competitive pricing includes standard 24 hour turnaround time for mold, and a variety of turnaround times for asbestos, along with our unmatched customer service.

Additionally, we don't believe in luring you in with an introductory price that is only good for a limited time. We have the best prices every day, for every client.

Shipping Options

Using FedEx as our trusted shipping partner, we receive discounted rates that we pass directly to you the consumer. Your price is based on the zone you are in, with no mark up or handling fees. Contact us for your shipping quote today.

Leadership Beyond The Microscope

Meet Steve Hayes Our Lead Microbiologist

Steve is a proven leader in mold and bacteria identification, indoor air quality and building science. His experience and knowledge span decades of dedication to accurate and reliable results analyzing samples. His leadership and expertise ensure quality and results remain at the highest level.

He earned a degree in Medical Technology from Marshall University, and attended McCrone Research Institute's course in fungal spore identification. He is also a registered Clinical Scientist with the American Society of Pathologist.

Customer Service

We are continually told by our clients the importance and value that they can call anytime and speak directly to a person that understands their business and understands what they are talking about. Our stellar customer service is available to all of our clients, whether you are a one-person shop or a 100 plus employee corporation. We offer extensive consultation to our clients at no additional charge. Hayes' friendly knowledgeable staff provides personal service to help grow your business, which grows ours. We feel the more we get to know you and your business the more we can meet your needs.

We can provide custom reports and other request, while maintaining our famous service and pricing.

The Hayes Microbial Difference means we care about our customers and their business.
